## SUMMARY

Full Stack Developer based in Melbourne with a few years of experience across agencies and product teams. I enjoy the whole process designing the backend, building the UI, writing the tests, and getting it shipped. I primarily work with **Laravel**, **React**, and **TypeScript**, but I'm comfortable picking up whatever the project needs. I care about doing it properly, not just getting it done.

## WORK EXPERIENCE

**Brightgreen**  
*Full Stack Developer*

Melbourne, VIC  
May 2025 - Present

- Migrated and refactored **Laravel MVC** application, modernising the frontend with **React** and **TypeScript** alongside **Redux** for state management.
- Delivered new features aligned with design workflows; managed tasks and progress via Monday CRM.
- Improved code reliability with full-stack test coverage: **PHPUnit** (backend), **Jest & Karma** (frontend), and **Cypress** (E2E), all integrated into **CI** pipelines.
- Enforced high code standards using **CI-integrated** linting tools (**ESLint**, **PHP CodeSniffer**), advanced static analysers (**PHPStan**, **SonarQube**), and collaborative code reviews.
- Integrated **AI** tools (**Cursor**, **Runbear**, **CodeRabbit**, **Sentry Seer**) to automate debugging, code reviews, and improve developer velocity.
- Executed multi-environment deployments and infrastructure tasks using **GitHub Actions**, **Docker**, **Vagrant**, **Deployer**, and **AWS** (S3, RDS, EC2).

**Arcadian Digital**  
*Full Stack Developer*

Melbourne, VIC  
Nov 2023 - March 2025

- Developed and maintained custom **Gutenberg** block builder tools (**React.js**) to streamline WordPress development, improving flexibility and scalability.
- Configured **AWS CodePipeline** for automated deployments, integrating Git (**Jenkins**) and rollback strategies.
- Enhanced **RESTful API** integrations, **SQL** queries, and security best practices within a **LAMP** stack environment.
- Conducted thorough cross-browser and device testing using **BrowserStack**, ensuring error-free deployment and consistent user experience across platforms.
- Built responsive, accessible UI components following **WCAG** guidelines, **BEM-based SASS** architecture, and **UI/UX** best practices for a seamless user experience.

**Newpath Web**  
*Full Stack Developer*

Melbourne, VIC  
Nov 2023 - Nov 2023

- Utilized **PHP**, **JavaScript**, **HTML5**, and **CSS3/Sass** within the **LAMP** stack on **Linux**, alongside **React**, **TypeScript**, and **.NET** framework to deliver optimised and scalable web applications .
- Led the redesign and optimisation of both new and existing **Drupal** and **WordPress** projects for multiple clients.
- Containerised custom **APIs**, **Node.js/Express** backends, frontend applications (React.js), and **WordPress/Drupal** sites with **Docker**.

## EDUCATION

**Swinburne University of Technology**  
*Bachelor of Information and Communication Technology*

Melbourne, VIC  
2022

## CERTIFICATIONS

Advanced Google Analytics - Google (2022), AWS Knowledge: Cloud Essentials - Amazon Web Services (AWS) (2023), SQL (Basic) Certificate – Hacker Rank (2023).
